

IB-Lite

PLUG-IN COMMUNICATION MODULE

Description

The IB-Lite module is a plug-in communication module with an Ethernet interface developed for selected ComAp controllers. The Ethernet interface allows for a fast remote connection of LiteEdit or IntelliMonitor to the controller from anywhere in the world through the Internet network, whereas all functions work the same way as when connected through a serial cable. The module also allows the controller to be integrated into a building management system using the Modbus/TCP protocol. A simple web-based interface will allow for basic monitoring and adjustment even for those who do not have LiteEdit or IntelliMonitor, just using their web browsers.

Benefits

- ▶ Integrated solution – the module is plugged in directly into the controller, no additional power supply and other wiring (except Ethernet cable itself).
- ▶ More protocols in one module – ComAp/TCP (LE, IMON), SMTP (active e-mails), HTTP (web access), Modbus/TCP (building management).
- ▶ Web access – basic monitoring and adjustment without any dedicated software.
- ▶ Perfect price/performance ratio

AirGate
Modern communications made simple. ComAp's powerful AirGate technology is provided in a range of our controllers and makes remote internet connection to the ComAp controller easy. Just register the AirGate enabled controller on our website and from then on let ComAp's unique system locate and maintain contact with the controller, no need to worry about VPN's, Static IP addresses or corporate firewalls, simple! "AirGate – Simply connected."

ComAp is a member of AMPS (The Association of Manufacturers of Power generating Systems).

ComAp products meet the highest standards, with every stage of production undertaken in accordance with the ISO certification obtained in 1998.

Features

- ▶ Plug-in module
- ▶ Ethernet 10/100Mbit RJ45 interface
- ▶ Web interface for configuration and firmware upgrade of the module
- ▶ ComAp protocol for communication with LiteEdit or IntelliMonitor
- ▶ SMTP protocol with authentication for sending of active e-mails
- ▶ Modbus/TCP protocol for integration into building management systems
- ▶ Web interface for basic monitoring and adjustment of the controller

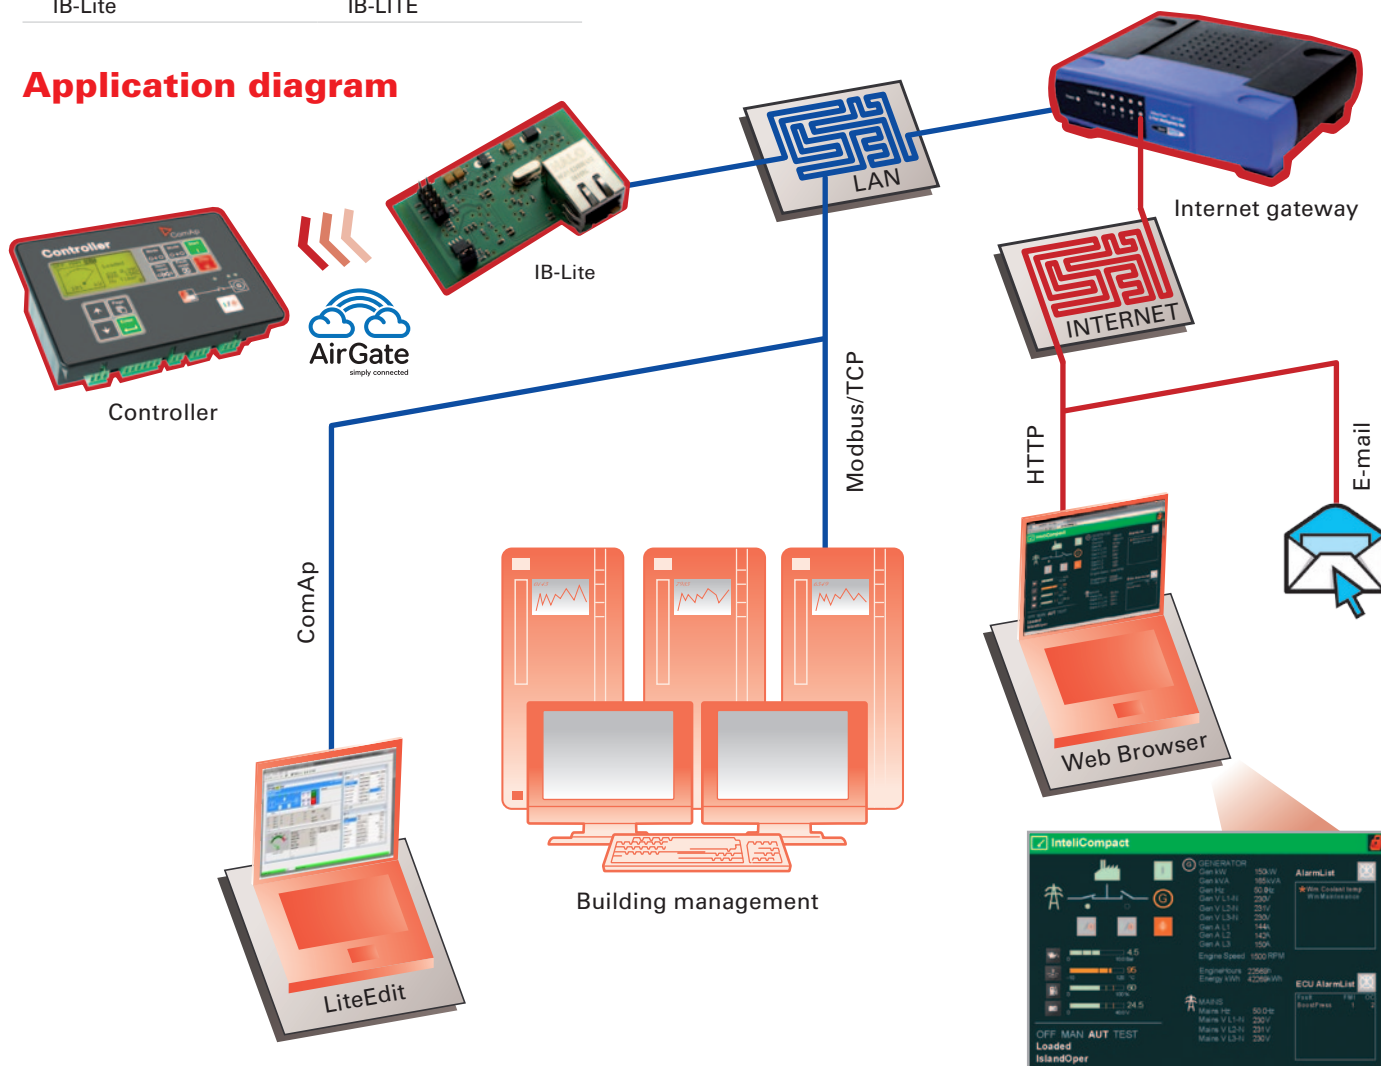

Compatible controllers

- ▶ InteliATS^{NT}
- ▶ InteliLite^{NT}
- ▶ InteliCompact^{NT}
- ▶ MainsCompact^{NT}
- ▶ InteliPro
- ▶ InteliDrive Lite
